# SKATE SIZE CHART

## FIND YOUR CORRECT BLADERUNNER SKATE SIZE

- Simple Method: We suggest selecting your normal shoe size.
- Detailed Method: While the Simple Method works for most people, a more accurate fit can be found by following the instructions below.

### MEASURE YOUR FEET

Use centimeters as a reference to find the best Rollerblade skate size. When measuring or tracing your feet, stand on a hard surface and place the heels against a wall for a more accurate measurement. Measure both feet and refer to the longer heel to toe measurement (see illustration).

MEASURED FOOT SIZE CM	SUGGESTED SIZE CM	SUGGESTED SIZE US	SUGGESTED SIZE US W	SUGGESTED SIZE UK	SUGGESTED SIZE EU
21.1-22.0	22.0		5	3	35
22.1-23.0	23.0		6	4	36.5
23.1-24.0	24.0		7	5	38
24.1-25.0	25.0	7	8	6	39
25.1-26.0	26.0	8	9	7	40.5
26.1-27.0	27.0	9	10	8	42
27.1-28.0	28.0	10		9	43
28.1-29.0	29.0	11		10	44.5
29.1-30.0	30.0	12		11	45.5
30.1-31.0	31.0	13		12	47

### SKATE PREP

Remove all paper and plastic from the toe box before putting the skates on. Securely fasten the closure system to lock the heels and ankles in.

### CHECK FOR PROPER FIT

Toes should not be pressed against the front of the skate or cramped. The toes can slightly brush against the front of the skate because the heels will settle back while in the skating position to make more room for the toes. Heels should have no to minimal lift.
