8 WALL CHARGER

DEVICE SPECIFICATIONS

FLASHLIGHT FUNCTIONS

- Ultra Bright LED

DIMENSIONS

- LxWxH: 3" x 2.8125 x .9375

PRODUCT WEIGHT

- 2.2 OZ.

GETTING STARTED

THIS DEVICE MUST BE CHARGED 6-8 HOURS BEFORE INITIAL USE.

Charging your device.

To charge this device, make sure the Safety Switch is in the OFF position. Insert Wall Charger into the Charging Input located at the bottom of the device and the other end of the Wall Charger directly into a 110v electrical socket. The LED Charging Indicator, located on the plug, will turn red confirming the device is charging. The LED Charging Indicator will remain red throughout the charging process and change from red to green when it has reached full charge. A full charge can take approximately 6-8 hours.

WARNING: Do not attempt to use or power the device while charging, as this could cause damage to the electrical outlet(s) and possibly result in fire. For additional warnings, see back.

WARNING: Do not allow water or moisture to enter inside the product, on or in the charging components and/or inside the charging outlets. For additional warnings, see back.

Signs a battery may be low

Decreasing light power, varying light outputs and slow stunning power will indicate a low battery. A fully charged device will run, on constant flashlight mode, for up to 5 hours. A device which has used minimal flashlight mode can hold a stun gun charge for up to 2-4 months. Run time will vary by usage of stun gun/flashlight combination, frequency of use and other factors. It is recommended to charge the device regularly.

To operate flashlight function

Slide the Safety Switch to the Middle position and the flashlight will turn ON. Pulling back the safety switch will turn the Flashlight OFF.

To operate the Stun Probes

Slide the Safety Switch to the most forward ON position and the red indicator light will turn on. Firmly press and hold the Grip to Stun Activator button with palm to turn the stun gun sparks ON. Releasing the Grip to Stun Activator will turn the stun gun sparks OFF.

Note: To safely turn the stun gun OFF completely, slide the Safety Switch to the back position. The red light should turn off.

Note: A one-sided spark when test firing is normal. However, both sides will spark upon contact. To test this, carefully place a sheet of paper across both probes and test fire.

Shock effects on assailant

Shock effects may vary. A quick touch will startle the assailant, accompanied with pain, discomfort, muscular contraction and shock. Contact on an assailant for further periods can cause the assailant to fall, lose balance and/or muscle control, cause mental confusion, muscle spasms and/or disorientation. Results may vary depending on the area on which the assailant is stunned, physical attributes of the assailant and other factors. This device does not cause permanent damage under normal circumstances. The user will not suffer a chargeback when using this device on an assailant.

WARNING: Do not shock an assailant on the head, heart or on an area of any other major organs.

GUARD DOG LIFETIME WARRANTY

This Guard Dog product has a lifetime warranty from the date of original purchase. Manufacturer warrants the product to be free from defective material or factory workmanship and agrees to repair or replace such products within normal use. Removal of battery pack, placement in moist/wet areas/surfaces, placement in extreme heat or cold, unintended use, mishandling, normal wear and tear, product life cycle use and/or self-inflicted damage to the device will void the warranty. See additional instructions, warnings and notices for further operating details. Owner must provide receipt of purchase/ownership from an authorized Guard Dog Security retailer.

Note: Avoid allowing the battery to completely drain before recharging, as this could decrease the life expectancy of the rechargeable battery and device.

GUARD DOG SECURITY

100% Satisfaction Policy

Guidance / Satisfaction / Trust

Guaranteed

Bought a Guard Dog Security product and wish you purchased another color instead? Another size? Different function and features? Worry not, Guard Dog's 100% Satisfaction Policy ensures that you will be satisfied with your ultimate self defense product choice, or we will exchange it until you are!

WARNING

- Never place this device face down when light is on. Doing so could burn/ignite surfaces and cause serious property damage. Always turn flashlight off when not in use.
- To prevent serious damage to eyesight, never look into flashlight when light is on.
- Do not touch lens of flashlight when light is on or if it was recently on. The lens may be hot and could cause serious burns.
- Do not allow children to handle or operate this device.
- Do not use this product for other than its intended use.
- Do not charge or operate in close proximity of combustible or flammable materials.
- Do not attempt to charge or operate this device if the cord, plug, battery, bulb, or any part of the tactical light is damaged or corroded.
- Do not meddle with the bulb, probes, or attempt to touch bulb.
- Avoid direct contact with the stun probes on this device.
- Do not use an outdoor AC outlet to recharge battery.
- Only use charging devices that are provided with this device or its authorized replacements.
- Do not disassemble or attempt to alter this device.
- Do not disassemble or tamper with the battery.
- Do not submerge the device, any internal components or any other parts/accessories that come with the device in water or allow moisture to enter.
- Do not dispose of battery. Contact your local county solid waste authority for proper recycling or disposal information.
- Do not use the device on metal surfaces, as it may cause electrical voltage to travel on the surface.
- Keep away from extreme temperatures and weather conditions.

NOTE: Failure to comply with the above will void the Guard Dog Lifetime Warranty.

*It is recommended to keep this device charged at all times.
It is the buyer's responsibility to check local and state laws
for the use of the device.*
